# SUBJECT INDEX

## Volume 70 (1990)

Abscisic acid, nitrogen dioxide, enzyme-linked immunosorbent assay, soybean, black turtle bean, 129
*Agrobacterium rhizogenes*, *Trifolium repens*, *Trifolium pratense*, *Lotus corniculatus*, genetic transformation, analysis of transformants 243
*A. rhizogenes* oilseed rape, transformation, *A. tumefaciens*, 91
*A. tumefaciens*, oilseed rape, transformation, *A. rhizogenes* 91
Allometry, miniaturization, in vitro shoots, growth rates, morphogenesis, *Pisum sativum*, 121
Amino acids, *Zea mays* L., lysine plus threonine, endosperm mutants, opaque-2, 81
Analysis of transformants *Agrobacterium rhizogenes*, *Trifolium repens*, *Trifolium pratense*, *Lotus corniculatus*, genetic transformation, 243
Androgenesis, pollen nuclei and DNA, cytophotometry, flow cytometry, *Nicotiana sylvestris* 255
Assay, β-glucuronidase , endogenous β-glucuronidase activity, transgenic plant, 133
ATPase, plasma membrane, auxin, calli, growth phase 209
Auxin, plasma membrane, ATPase, calli, growth phase 209
Auxotrophy, *Datura*, direct gene transfer, kanamycin-resistance, protoplasts, universal hybridizer, 105

Black turtle bean, abscisic acid, nitrogen dioxide, enzyme-linked immunosorbent assay, soybean, 129
*Brassica napus*, cruciferin, seed globulin, storage protein, 57

Cadmium, maize, roots, cysteine glutathione phytochelatin, 155
Caffeoylshikimic acid, chlorogenic acid, differential effects of light and fungal elicitor, hydroxycinnamoyl-CoA:D-quinate hydroxycinnamoyl transferase, hydroxycinnamoyl-CoA:shikimate hydroxycinnamoyl transferase, carrot (*Daucus carota* L.) 167
Calcium, photosynthesis Calvin cycle fructose-1,6-bisphosphatase, 1
Calli, plasma membrane, ATPase, auxin, growth phase 209
Calvin cycle photosynthesis fructose-1,6-bisphosphatase, calcium, 1
Capsaicin, *Capsicum annuum*, elicitors, immobilized cells, placental tissue, precursors 223
*Capsicum annuum*, capsaicin, elicitors, immobilized cells, placental tissue, precursors 223
Carrot (*Daucus carota* L.) chlorogenic acid, caffeoylshikimic acid, differential effects of light and fungal elicitor, hydroxycinnamoyl-CoA:D-quinate hydroxycinnamoyl transferase, hydroxycinnamoyl-CoA:shikimate hydroxycinnamoyl transferase, 167
Cell sap pH, fusicoccin, isobutyric acid, *Oryza sativa*, proline accumulation, vanadate, 43
*Ceratocystis ulmi*, *Ulmus americana*, elm callus, culture filtrate, Dutch elm disease, 191
Chlorogenic acid, caffeoylshikimic acid, differential effects of light and fungal elicitor, hydroxycinnamoyl-CoA:D-quinate hydroxycinnamoyl transferase, hydroxycinnamoyl-CoA:shikimate hydroxycinnamoyl transferase, carrot (*Daucus carota* L.) 167
Choroplasts, fructose-1,6-bisphosphatase, high pH, enzyme dissociation, 35
Circular dichroism rice, storage proteins, fluorescence, 73
Cruciferin, *Brassica napus*, seed globulin, storage protein, 57
Culture filtrate, *Ulmus americana*, *Ceratocystis ulmi*, elm callus, Dutch elm disease, 191
Cysteine maize, roots, cadmium, glutathione phytochelatin, 155
Cytochrome *P*-450, *Pisum sativum* L., isolated leaf microsomes, linoleate oxidation, lipoxygenase 175
Cytogenetics, protoplast fusion, tomato, isozymes, RFLP, morphology 197
Cytokinin metabolites, translocation, lupin (*Lupinus angustifolius*) 65
Cytophotometry, pollen nuclei and DNA, androgenesis, flow cytometry, *Nicotiana sylvestris* 255

*Datura*, auxotrophy, direct gene transfer, kanamycin-resistance, protoplasts, universal hybridizer, 105
Differential effects of light and fungal elicitor, chlorogenic acid, caffeoylshikimic acid, hydroxycinnamoyl-CoA:D-quinate hydroxycinnamoyl transferase, hydroxycinnamoyl-CoA:shikimate hydroxycinnamoyl transferase, carrot (*Daucus carota* L.) 167
Direct gene transfer, auxotrophy, *Datura*, kanamycin-resistance, protoplasts, universal hybridizer, 105
DNA transfer, electroporation, pollen germination, seed production, β-glucuronidase, 181
Dutch elm disease, *Ulmus americana*, *Ceratocystis ulmi*, elm callus, culture filtrate, 191

Electroporation, pollen germination, DNA transfer, seed production, β-glucuronidase, 181
Elicitors, *Capsicum annuum*, capsaicin, immobilized cells, placental tissue, precursors 223

Elm callus, *Ulmus americana*, *Ceratocystis ulmi*, culture filtrate, Dutch elm disease, 191
Endogenous β-glucuronidase activity, β-glucuronidase, assay, transgenic plant, 133
Endosperm mutants, *Zea mays* L., amino acids, lysine plus threonine, opaque-2, 81
Enzyme-linked immunosorbent assay, abscisic acid, nitrogen dioxide, soybean, black turtle bean, 129
Enzyme dissociation, fructose-1,6-bisphosphatase, choroplasts, high pH, 35
Esterase, maize, female receptivity, in vitro pollination fertilization, protein markers, peroxydase, 11

Female receptivity, maize, in vitro pollination fertilization, protein markers, peroxydase, esterase, 11
Flavonoids, genetic engineering, flower color, 49
Flower color, genetic engineering, flavonoids, 49
Flow cytometry, pollen nuclei and DNA, androgenesis, cytophotometry, *Nicotiana sylvestris*, 255
Fluorescence, photochemical activity, magnesium effects, oxyfluorfen, 27
Fluorescence, rice, storage proteins, circular dichroism, 73
Fructose-1,6-bisphosphatase, choroplasts, high pH, enzyme dissociation, 35
Fructose-1,6-bisphosphatase, photosynthesis Calvin cycle calcium, 1
Fusicoccin, cell sap pH, isobutyric acid, *Oryza sativa*, proline accumulation, vanadate, 43

Genetic engineering, flower color, flavonoids, 49
Genetic transformation, *Agrobacterium rhizogenes*, *Trifolium repens*, *Trifolium pratense*, *Lotus corniculatus*, analysis of transformants 243
β-Glucuronidase, electroporation, pollen germination, DNA transfer, seed production, 181
β-Glucuronidase, endogenous β-glucuronidase activity, assay, transgenic plant, 133
Glutathione maize, roots, cadmium, cysteine phytochelatin, 155
*Glycine soja* Sieb. et Zucc., wild soybean, legumes, protoplasts culture, plant regeneration, 101
Growth phase plasma membrane, ATPase, auxin, calli, 209
Growth rates, miniaturization, in vitro shoots, allometry, morphogenesis, *Pisum sativum*, 121

*Helianthus annuus*, nitrate uptake, nitrite uptake, nitrate reductase, nitrite reductase, inhibition by ammonium, 21
High pH, fructose-1,6-bisphosphatase, choroplasts, enzyme dissociation, 35
Hydroxycinnamoyl-CoA:D-quinate hydroxycinnamoyl transferase, chlorogenic acid, caffeoylshikimic acid, differential effects of light and fungal elicitor, hydroxycinnamoyl-CoA:shikimate hydroxycinnamoyl transferase, carrot (*Daucus carota* L.), 167
Hydroxycinnamoyl-CoA:shikimate hydroxycinnamoyl transferase, chlorogenic acid, caffeoylshikimic acid, differential effects of light and fungal elicitor, hydroxycinnamoyl-CoA:D-quinate hydroxycinnamoyl transferase, carrot (*Daucus carota* L.), 167

Immobilized cells, *Capsicum annuum*, capsaicin, elicitors, placental tissue, precursors 223
Inhibition by ammonium, nitrate uptake, nitrite uptake, nitrate reductase, nitrite reductase, *Helianthus annuus*, 21
In vitro pollination fertilization, maize, female receptivity, protein markers, peroxydase, esterase, 11
In vitro selection, *Lycopersicon*, mutagenesis, protoplasts, lincomycin resistance, maternal inheritance 231
In vitro shoots, miniaturization, growth rates, allometry, morphogenesis, *Pisum sativum*, 121
Isobutyric acid, cell sap pH, fusicoccin, *Oryza sativa*, proline accumulation, vanadate, 43
Isolated leaf microsomes, *Pisum sativum* L., linoleate oxidation, cytochrome *P*-450, lipoxygenase 175
Isozymes, protoplast fusion, tomato, cytogenetics, RFLP, morphology 197

Kanamycin-resistance, auxotrophy, *Datura*, direct gene transfer, protoplasts, universal hybridizer, 105

Latency, plasma membrane, NADH-ferricyanide reductase, *Zea mays*, 143
Legumes, *Glycine soja* Sieb. et Zucc., wild soybean, protoplasts culture, plant regeneration, 101
*Limonium perezii*, statice, protoplast culture, plant regeneration, 115
Lincomycin resistance, *Lycopersicon*, mutagenesis, protoplasts, in vitro selection, maternal inheritance, 231
Linoleate oxidation, *Pisum sativum* L., isolated leaf microsomes, cytochrome *P*-450, lipoxygenase, 175
Lipoxygenase *Pisum sativum* L., isolated leaf microsomes, linoleate oxidation, cytochrome *P*-450, 175
*Lotus corniculatus*, *Agrobacterium rhizogenes*, *Trifolium repens*, *Trifolium pratense*, genetic transformation, analysis of transformants, 243
Lupin (*Lupinus angustifolius*) cytokinin metabolites, translocation, 65
*Lycopersicon*, mutagenesis, protoplasts, in vitro selection, lincomycin resistance, maternal inheritance 231
Lysine plus threonine, *Zea mays* L., amino acids, endosperm mutants, opaque-2, 81

Magnesium effects, photochemical activity, fluorescence, oxyfluorfen, 27
Maize, female receptivity, in vitro pollination fertilization, protein markers, peroxydase, esterase, 11
Maize, roots, cadmium, cysteine glutathione phytochelatin, 155
Maternal inheritance *Lycopersicon*, mutagenesis, protoplasts, in vitro selection, lincomycin resistance, 231
Miniaturization, in vitro shoots, growth rates, allometry, morphogenesis, *Pisum sativum*, 121
Morphogenesis, miniaturization, in vitro shoots, growth rates, allometry, *Pisum sativum*, 121

Morphology protoplast fusion, tomato, cytogenetics, isozymes, RFLP, 197
Mutagenesis, *Lycopersicon*, protoplasts, in vitro selection, lincomycin resistance, maternal inheritance, 231

NADH-ferricyanide reductase, plasma membrane, latency, *Zea mays*, 143
*Nicotiana sylvestris* pollen nuclei and DNA, androgenesis, cytophotometry, flow cytometry, 255
Nitrate reductase, nitrate uptake, nitrite uptake, nitrite reductase, inhibition by ammonium, *Helianthus annuus*, 21
Nitrate uptake, nitrite uptake, nitrate reductase, nitrite reductase, inhibition by ammonium, *Helianthus annuus*, 21
Nitrite reductase, nitrate uptake, nitrite uptake, nitrate reductase, inhibition by ammonium, *Helianthus annuus*, 21
Nitrite uptake, nitrate uptake, nitrate reductase, nitrite reductase, inhibition by ammonium, *Helianthus annuus*, 21
Nitrogen dioxide, abscisic acid, enzyme-linked immunosorbent assay, soybean, black turtle bean, 129

Oilseed rape, transformation, *A. tumefaciens*, *A. rhizogenes*, 91
Opaque-2, *Zea mays* L., amino acids, lysine plus threonine, endosperm mutants, 81
*Oryza sativa*, cell sap pH, fusicoccin, isobutyric acid, proline accumulation, vanadate, 43
Oxyfluorfen, photochemical activity, fluorescence, magnesium effects, 27

Peroxydase, maize, female receptivity, in vitro pollination fertilization, protein markers, esterase, 11
Photochemical activity, fluorescence, magnesium effects, oxyfluorfen, 27
Photosynthesis Calvin cycle fructose-1,6-bisphosphatase, calcium, 1
Phytochelatin, maize, roots, cadmium, cysteine glutathione, 155
*Pisum sativum*, miniaturization, in vitro shoots, growth rates, allometry, morphogenesis, 121
*Pisum sativum* L., isolated leaf microsomes, linoleate oxidation, cytochrome *P*-450, lipoxygenase, 175
Placental tissue, *Capsicum annuum*, capsaicin, elicitors, immobilized cells, precursors, 223
Plant regeneration, *Glycine soja* Sieb. et Zucc., wild soybean, legumes, protoplasts culture, 101
Plant regeneration, *Limonium perezii*, statice, protoplast culture, 116
Plasma membrane, ATPase, auxin, calli, growth phase, 209
Plasma membrane, NADH-ferricyanide reductase, latency, *Zea mays*, 143
Pollen germination, electroporation, DNA transfer, seed production, β-glucuronidase, 181
Pollen nuclei and DNA, androgenesis, cytophotometry, flow cytometry, *Nicotiana sylvestris*, 255
Potato, *Solanum commersonii*, protoplasts, regeneration 215
Precursors *Capsicum annuum*, capsaicin, elicitors, immobilized cells, placental tissue, 223
Proline accumulation, cell sap pH, fusicoccin, isobutyric acid, *Oryza sativa*, vanadate, 43
Protein markers, maize, female receptivity, in vitro pollination fertilization, peroxydase, esterase, 11
Protoplasts, auxotrophy, *Datura*, direct gene transfer, kanamycin-resistance, universal hybridizer, 105
Protoplasts, *Lycopersicon*, mutagenesis, in vitro selection, lincomycin resistance, maternal inheritance 231
Protoplasts, *Solanum commersonii*, potato, regeneration, 215
Protoplasts culture, *Glycine soja* Sieb. et Zucc., wild soybean, legumes, plant regeneration, 101
Protoplast culture, *Limonium perezii*, statice, plant regeneration, 116
Protoplast fusion, tomato, cytogenetics, isozymes, RFLP, morphology 197

Regeneration, *Solanum commersonii*, potato, protoplasts, 215
RFLP, protoplast fusion, tomato, cytogenetics, isozymes, morphology, 197
Rice, storage proteins, fluorescence, circular dichroism, 73
Roots, maize, cadmium, cysteine glutathione phytochelatin, 155

Seed globulin, *Brassica napus*, cruciferin, storage protein, 57
Seed production, electroporation, pollen germination, DNA transfer, β-glucuronidase, 181
*Solanum commersonii*, potato, protoplasts, regeneration, 215
Soybean, abscisic acid, nitrogen dioxide, enzyme-linked immunosorbent assay, black turtle bean, 129
Statice, *Limonium perezii*, protoplast culture, plant regeneration, 116
Storage protein, *Brassica napus*, cruciferin, seed globulin, 57
Storage proteins, rice, fluorescence, circular dichroism, 73

Tomato, protoplast fusion, cytogenetics, isozymes, RFLP, morphology, 197
Transformation, oilseed rape, *A. tumefaciens*, *A. rhizogenes*, 91
Transgenic plant, β-glucuroniase, endogenous β-glucuronidase activity, assay, 133
Translocation, cytokinin metabolites, lupin (*Lupinus angustifolius*), 65
*Trifolium pratense*, *Agrobacterium rhizogenes*, *Trifolium repens*, *Lotus corniculatus*, genetic transformation, analysis of transformants 243
*Trifolium repens*, *Agrobacterium rhizogenes*, *Trifolium pratense*, *Lotus corniculatus*, genetic transformation, analysis of transformants, 243

*Ulmus americana*, *Ceratocystis ulmi*, elm callus, culture filtrate, Dutch elm disease, 191
Universal hybridizer, auxotrophy, *Datura*, direct gene transfer, kanamycin-resistance, protoplasts, 105

Vanadate, cell sap pH, fusicoccin, isobutyric acid, *Oryza sativa*, proline accumulation, 43

Wild soybean, *Glycine soja* Sieb. et Zucc., legumes, protoplasts culture, plant regeneration, 101

*Zea mays*, plasma membrane, NADH-ferricyanide reductase, latency, 143
*Zea mays* L., amino acids, lysine plus threonine, endosperm mutants, opaque-2, 81

*Plant Science*, 70 (1990) 271 – 272
